Simple and flexible mobile reading

- Remote reading of heat, cooling and water meters
- Collect meter data on the go with an app for smartphone or tablet
- Easy to get started without large investments

It does not have to be hard to get started with remote meter reading. With READy mobile reading, you can say goodbye to manual readings, reporting via the internet and estimated calculations. Now you can personally read consumption data automatically, without disturbing your consumers.

Thus, READy mobile reading fits right into your daily operations and allows you to save time and money, and run a flexible business.

"The reading of our meters has become much easier, and we can detect leakages faster to limit the water waste. At the same time, we do not have to think about data security and IT resources as Kamstrup takes care of this."

*Operation Manager Per Møller,
Børkop Waterworks*

"READy just works! Even without a lot of training, it is easy to use and we avoid double work and minimize the risk of errors,"

*Olav Worm Nielsen,
Thisted Water Company*

Mobile reading – collect your data on-the-go

With READYy mobile reading you can automatically read your meters on the go. Using Google Maps, the meters are automatically located on a map on your smartphone or tablet.

When you drive, your smartphone automatically displays the nearby meters, which meters that are being read, and which meters that remains to be read. You do not have to follow a fixed route and the data is transferred so quickly that you can drive with normal speed and still collect all readings.

Easy to get started

- A Install the app on your smartphone
- B Synchronise with READYy Manager
- C Bring your smartphone along in your car

You are now ready to start the meter reading.

READYy Manager – a complete overview

Utilise your data to its full extend

Meter data is easily transferred to READYy Manager which is a program on your PC that keeps track of and stores your meter data. READYy Manager offers a variety of functions which easily gives you an overview of your data and the tools to utilise it to its full extend.

Complete overview

READYy Manager visualises the consumption of individual meters as bar charts over a given period of time. You can easily get an overview of the exact consumption, making it a great tool to settle disputes and analyse unexpected consumption.

The data in READYy Manager can be coupled with alarms to ease the troubleshooting and show any connections between the consumption and a given alarm.

Grouping of meters

To make the mobile reading of the meters easy and clear, you can create groups in READYy Manager, which include meters in a specific area. These groups can be read independently, giving you a detailed overview of the consumption and alarms and creating the foundation for further analysis.

Reliable billing

Via the export feature of READYy Manager, all registered consumption data can easily be exported directly to your billing system of choice, allowing you to save time and trouble related to the billing process.

The electronic safety lock in all Kamstrup meters ensures that you can only read the meters associated with your customer database, and protects the meter's data against unwanted access. This ensures that only you can read the meters.

READy

A flexible solution

Kamstrup's solutions are built to grow with your company. If you choose READy mobile reading, you get the perfect solution for mobile reading of meters, and you also get a solution that can be expanded to a network with automatic meter readings – without you even having to get in the car.

Besides simplifying the meter reading, a READy network solution opens the door to new possibilities for more effective pressure management, tracking of water waste and surveillance of your distribution network.

Kamstrup service and hosting solutions

When you choose Kamstrup as your service partner, you get a dedicated specialist who is focused on giving you exactly the help you need. Our System Support solution gives you a trouble-free daily operation provided through fast and effective personal support for your meter reading system, when needed.

With a System Hosting Solution you are secured optimal IT performance with a minimal effort. You leave server operation, software installation, maintenance and data back-up to us. Choosing a Kamstrup hosting solution for your meter reading system allows you to spend more of your time and resources on what you do best – quite simply.
